Hello!

I am a positive and accurate woman who takes her job seriously, while I am a team player who is eager to work and willing to take initiative. It is important for me to be socializing with other people and this means that I have chosen to be a Scout leader where I meet various people and also from different cultures.

I am applying to you to develop as a person and gain more experience, but also to use my skills and experience about animals and as a personal assistant. To eventually obtain permanent employment in your company.

My interest in animals is high, so I studied at Himmelstalundsgymnasiet with a focus on animal care and science to learn more about animals. When I graduated in 2006 I continued on the same topic with animals. Started to study at Linköping University, where they had a biology program focusing on Ethology and animal biology. After three years biology bachelor, the master's program was available. Some of the courses that I have been taking, this year were partly at Kolmården Wildlife Park (Theory and Methods in / of Applied Ethology, Zoo biology, Behavioral Neurobiology and Primate Ethology). In those courses I have worked with various animals such as seals, elephants and primates. The last year I have done my master thesis at Kolmården Wildlife Park and at Musk ox centrum in Tännäs, from May 2010 to May 2011. The aim of the study was to investigate the musk ox activity in relation to the size and shape of the enclosure, as well as if changing of feeding and watering places could increase the activity of the musk ox, and thereby improve their hoof status. These measures could lead to a better reintroduction of musk ox into an established wild population in the future. I am graduating in summer 2011. Besides studying I am working with customers with disabilities since 2004 as a personal assistant at the company Assistansia. Where I have learned to be service oriented and flexible, and to know what mood the person has for the day and adapt to it.

I took my car license in 2005 and also have access to my own car. Have also taken a tractor license in Himmelstalundsgymnasiet (2004).

I hope that I have captured your interest and hope to hear from you.

Best wishes, Sophie Tunros
